

1. What was the most impactful thing(s) you learned this week and why do you think so?

I really like the SASS pre-processor because I can make coding faster, easier, and organized. The feature that I like the most is Nesting because it helps me to think about the structure of my HTML and helps me see everything organized which makes coding easier and helps me to avoid repeating myself when coding. Also, think that the mixin feature is super good cause can save me a lot of time.

2. What questions do you have about this week's chosen topic(s) and/or exercises (first-time students) or websites you are working on (repeat students)?

I had the following questions:

- What is the difference between SASS variables and CSS variables?
 - Why was I getting an error when I wrote: "@import mixin" without that piece of code, my SASS file works, but with it doesn't.
 - Why was I getting an error when trying to extend selectors across media queries?
3. Would you like specific feedback from your instructor? If so, what things would you like feedback on? (Please use the Canvas calendar to schedule time to meet with your instructor or attend a study session.)

I appreciate the instructor's willingness to help us and teach us. The video tutorial that you shared this week is fired and was such a good help to understand SASS. Thank you! I don't need specific feedback for this week.

4. Where would you go next to learn more about this week's topic(s)? Give 2-3 links to resources that look promising to help answer the questions you indicated in the quiz question above.

<https://css-tricks.com/difference-between-types-of-css-variables/>
<https://sass-lang.com/documentation/at-rules/extend#extend-in-media>

5. Did you participate with the class on Slack? (You can participate by asking a question, answering a question, or sharing a resource you've found. Or you can share your thoughts on what you're learning this week. Or you can answer any questions your instructor might have given in their announcement.)

Yes, I did.

6. Please rate your success with learning and this week's work on a scale of 1 to 4.
